7.HIGHEST ORDER AMOUNT

The screenshot shows the MySQL Workbench interface for a local instance of MySQL 8.0. The left sidebar contains the 'MANAGEMENT' section with options like Server Status, Client Connections, Users and Privileges, Status and System Variables, Data Export, and Data Import/Restore. Below this is the 'INSTANCE' section with Startup / Shutdown, Server Logs, and Options File. The 'PERFORMANCE' section includes Dashboard, Performance Reports, and Performance Schema Setup. The main editor area displays two SQL files: 'SQL File 5*' and 'SQL File 6*'. The 'SQL File 6*' tab is active, showing the following SQL queries:

```
140 FROM orders;
141 • SELECT AVG(purch_amt) AS average_order
142 FROM orders;
143
144
145 • SELECT MAX(purch_amt) AS highest_order
146 FROM orders;
147
148
```

Below the SQL editor, the 'Result Grid' is visible, showing a single row with the value 5760.00 for the 'highest_order' column. The 'Output' section at the bottom displays a table of action output:

#	Time	Action	Message
✓ 56	15:42:36	SELECT * FROM orders WHERE salesman_id=5...	4 row(s) returned
✓ 57	15:43:30	SELECT * FROM orders ORDER BY purch_amt ...	12 row(s) returned
